

EZ Update

Build

- Make sure node.js and npm are installed, you can check with `node -v` and `npm -v`
- Download files or clone repo, then open terminal in that directory
- Run `npm install --save-dev electron`, `npm install --save-dev @electron-forge/cli` and `npm install --save-dev win-version-info`
 - Recommended version: electron:24.3.0, electron-forge/cli:6.1.1, win-version-info:6.0.1
- run `npm run make` and check /out directory

Usage
